

POSITION OFFER: FULL STACK WEB DEVELOPER

*Are you passionate about technology?
Want to build a product that makes a difference globally?
Are you looking for a fast-paced scale-up ready to go global?*

ABOUT SAFE AG SYSTEMS

Safe Ag Systems™, introduced to the market late 2016, is a cloud-based solution for managing work health and safety compliance in agricultural business environments. Designed for practical application on farm, the system helps business owners reduce risk and move rapidly towards compliance. Please view our short product demonstration video on our website www.safeagsystems.com for more information.

ABOUT THE ROLE

- Based in Adelaide South Australia, you will deliver beautiful software that is valuable to our clients.
- We will offer you flexible working hours and arrangements that enable you to balance your life and passions.
- You will collaborate with our in-house design and testing team to develop new components and functionality.
- Have a key role in growing a high-productivity software development team.
- Open and willing to be hands on to maintain existing components and functionality including bug fixing and investigation.
- Deploy updates to live environments, give insight into user analytics and assist with writing requirements and design documents.

Required skills:

- Experience with .NET framework (C#) programming, specifically WebForms
- Strong web development skills (HTML, Javascript, CSS, jQuery)
- Able to develop with data security as a top priority
- Familiarity with Microsoft SQL Server, including
 - Writing CRUD queries and stored procedures
 - Creating and modifying tables
 - Managing indexes
- Proven experience working in a software team, including
 - Familiarity with version control systems such as Git
 - Confidence in deploying code to live environments
 - Able to document work effectively

Bonus skills:

- Experience working with payment processing systems (such as Stripe)
- Developing and deploying Windows Services
- Experience using Azure cloud-based services
- Mobile developments skills with Xamarin
- Familiarity with mobile deployment processes (on iOS and Android marketplaces)

If this position is one you wish to consider, please send a cover letter introducing yourself and resume to katy@safeagsystems.com by COB 7th December 2018.
